### **Notification of Court Litigation for Crimes Against Humanity**

Dear Mr./Mrs. [Neighbour],

As you have already known for a long time, I am being continuously shot by electromagnetic weapons in my flat. I have sent a request to cease and desist to the entire neighbourhood. However that was ignored, and the attacks on me are continuing unabated and I am being hurt even more brutally.

I am now going to litigate in court for these crimes against humanity which are being perpetrated against me and thousands of other people. You are thereby part of the main suspects as my home is being gunned from [West/East/North/South] and your house is situated exactly in that direction. As a result of the gunning I could not use my [bedroom/dining room/sitting room] for over 1 to 2 years.

Electromagnetic weapons can be camouflaged as miscellaneous garden utensils, as Dr. Reinhard Munzert has established from *Siemens* insiders, and these weapons can also be built into walls. For this reason, it is very difficult for the victims to establish where the weapons are located. However, that does not change the fact that I measured the attacks, made them audible and visible and can prove injuries that prove that I am being gunned.

Should you not be involved in these attacks, then that will be revealed during the course of the hearings since the *Nachrichtendienst des Bundes* [Swiss Intelligence Agency] is precisely aware whom it has hired and paid for the attacks on me. In that case, I ask you to keep this letter, as you are definitely affected by the reflection of electromagnetic shots from my housewall and thus could have received half the dose. In that case, you have a claim of damages against the *Nachrichtendienst des Bundes* and against the Swiss State should you have developed cancer or other health complaints or should you develop them in future.

Should you however be involved in the attacks against me, you are liable with your private wealth for damages and tort for me and my husband. You are then also taking part in crimes against humanity, grievous bodily harm and attempted murder, and can and will be prosecuted outside of Switzerland with consequences domestically.

Yours sincerely,

Katherine Horton
