

Dear Private Eye,

I am trying to bring attention to horrendous crimes being committed, using the fact that most do not understand this technology, nor can they believe it exists. I am a particle physicist and after investigating corrupted systems, I am being attacked with it too.

I really need help. A careless publication would be damaging, I believe. However, there must be gradual, gentle disclosure about this because people are being murdered with this new technology and the police, courts and coroners are completely unprepared for this. Please call me.
