

# Recapturing Our Systems from Organised Crime

## *Main Steps – Quick Guide*

### **1. Make a System Broadcast**

Inform everyone of what is happening so they can help you take action.

### **2. Recruit individuals with expertise who can actively lead action.**

Expertise helps you to take better action and they can help you reach others.

### **3. Reach out and mobilise others along the social networks of your recruits.**

People are more willing to act if the appeal comes from someone they know.

**4. Build trust. Let others get to know you and your goals.**

Show what you do and what you stand for on YouTube, social media, websites.

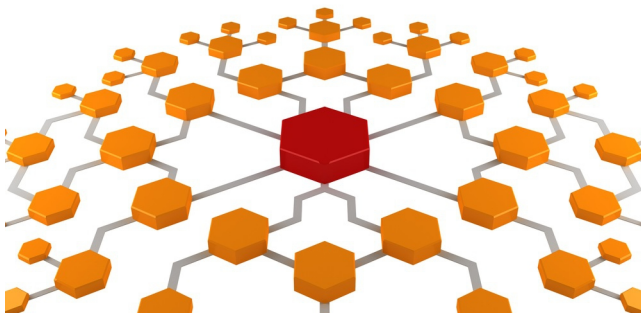

**5. Use fast cycles and iterations. Focus on learning not perfection.**

Try something quickly and improve it if it fails.

**6. Identify the key infrastructure that needs to be recaptured.**

For example media, police, judiciary. Focus on your local paper, station, court.

## **7. Identify the criminals.**

Find out which neighbour, police officer, judge or other person is involved.

## **8. Collect evidence against them.**

Turn every offence they commit into court-actionable evidence against them.

## **9. Aim to shut down the criminals permanently.**

Aim for court action to jail the criminals or to give them death penalties.

**10. Actively help others along the way. Pull each other up to get better.**

Mutual support ratchets everyone upwards into a better and better state.
