

Confirmation of Validity of Published Affidavits

To whom it may concern,

I, Dr. Katherine Horton, particle physicist and systems analyst, and founder of the *Joint Investigation Team US-Europe for Directed Energy Weapons, Military Neuro/Biotechnology and Systemic Corruption*, state on oath and say as follows. I make this affidavit based on my own personal knowledge, unless otherwise stated, and that the following facts and matters are accurate to the best of my knowledge.

1. I confirm that the affidavits that are published on the website of the Joint Investigation, see <https://jointinvestigation.org/appeals/international-affidavits/> and are backed-up on my personal website to guard against hacking and sabotage, see <https://stop007.org/home/court-cases-and-evidence/international-affidavits/> were submitted for the international collection of victim affidavits launched by myself for the Joint Investigation Team on 17 Nov 2018 using a 94-page template that I have prepared.
2. The details and purpose of the affidavit collection are summarised in the *Explanatory Notes* that can be downloaded along with the affidavit template from the Joint Investigation site <https://jointinvestigation.org/appeals/appeal-for-affidavits/> and from my personal website, see <https://stop007.org/home/burning-down-the-house/affidavit-collection/>
3. The affidavits that are published on the websites, stated above in paragraph 1, were all submitted with a copy of photo-identification such as a passport, ID card or drivers licence. They were also submitted with a Statement of Truth signed before a witness who is a person entitled to administer oaths in the respective country of the victim. The witness confirms with a signature that the affidavit has indeed been signed by the person who claims to have completed the affidavit.
4. To protect the personal information such as name, address and signature of the victims, the first and the last page of their affidavit that contain this personal information have been stripped from the affidavits and only the central anonymous part has been published.
5. Investigators or courts raising doubts about the validity of a given affidavit can cross-check the affidavit with the version published on the sites stated in paragraph 1 above using the Document Authentication Code. Furthermore, they can take this document as a confirmation made under oath that all affidavits have been submitted with photo-identification and a Statement of Truth signed under oath before a witness.
6. Victims and investigators are free to download the affidavits published on the sites stated in paragraph 1 above and use them for investigations, to support witness statements and in support of court cases against perpetrators.

Dr. Katherine Horton
Particle Physicist, Systems Analyst
Founder of the Joint Investigation Team US-Europe for
