Dear Dr. LaPorte,

Thank you very much for your swift reply. While I cannot disclose the identity of my clients, the past and current court cases that I am supporting can be found online along with tons of documentation on targeting, gang-stalking, Directed Energy Weapons, non-consensual implanting and neurotechnology assaults.

One case, for example, reported on in English is the case of Frederic Laroche in France, whose father was a human experimentation subject in a Nazi prisoners of war camp. His brother was a professor of philosophy in France who died a most unfortunate and suspicious death after he had decades-long "Voice to Skull", which is the military communications technology used in field agents and pilots. It turned out that both Frederic Laroche and his mother were implanted with radio-frequency microchips. You can find the video recording of the measurement with a bug detector on the bottom third of the page here: <https://stop007.org/home/court-cases-and-evidence/frederic-laroche/>

Frederic Laroche was forcefully committed to psychiatry where his breathing was paralysed with neurotoxins by a set of criminal and highly fraudulent doctors trying to silence him. He was also the victim of an entrapment operation by French Intel who involved him in a stage incident that they claimed was a car accident. They withheld/disappeared the CCTV of the incident. Shortly before testifying in his court case as an expert witness, French Intel involved me also in a staged car accident where they smashed into my car from behind and tried to push me into the car in front to blame the accident on me and disqualify me as an expert witness.

Regarding implanting, there are several ways that implants can be detected: Bug detectors and EMF measurements work on radio-frequency chips implants, of which the typical victim would have several dozens making up a so called Body Area Network. See especially the diagram on page 2

here: <https://stop007crimes.files.wordpress.com/2018/04/technologies-05-00043-v2.pdf>

It shows that by 2016, the challenge was not the body-internal chip communication, but rather the body-to-body transfer of signals making up an "Internet of Things IN OUR BODY". You will also note that the chips referred in that paper are not "wearable" devices like the Apple Fitbit - since no one would strap something both to their wrist, ankle and shoulder - but rather veiled references to non-consensual implants.

Voice-to-Skull (V2K) implants are typically found via the radio-frequency emissions coming from the ear canal or from around the ear, where older versions of the technology would hide the antenna in the fold behind the ear.

Images and entire high-definition and interactive virtual reality movies are sent to victims' eye via covert eye implants. There are several makes of those, which range from contact lenses to sensor containers injected through the pupil behind the lens. One way to make eye implants visible is to shine UV light onto the eye of a victim. When an eye implant is present, the pupil reflects bright green and the iris purple (and often with visible chip readout structure on the iris showing up in purple). For an example of what that looks like scroll down to the eye images here:

<https://stop007.org/home/equipment-detection/#UVtorch>

Those eye implants would be used to terrorise victims with "hallucinations" that are in fact video footage broadcast to and shown on victims' eye implants. The typical footage ranges from devils, snakes, horror scenes, scenes of violence and even human ritual sacrifice or the murder of pets, children and loved ones.

The overall chip technology on the head and inside the brain is called Synthetic Telepathy in declassified documents of the US military. They allow a complete neurological take-over of a victim including thoughts, emotions, sensory input and limb control. This technology is in the process to be hooked up to AI so that each and every individual can be controlled or crippled at will by their personal AI torture master.

Regarding the gang-stalking, harassment and frequent housebreaking that people report, those are crimes committed by the national and international surveillance networks of the Intel Agencies. They are

based on and use the Masonic networks and engage in something called Zersetzung or COINTELPRO 2.0, see here: <https://en.wikipedia.org/wiki/Zersetzung>

The current reincarnation of COINTELPRO is using harassment and brutal physical assault with Directed Energy Weapons to study the remote-control and targeted destruction of the human brain. Victims are slowly tortured to death in the most sadistic fashion imaginable.

If you would like to know what it looks like to be assaulted by a Directed Energy Weapon you can find a clip where a shot in the face from a corrupted neighbour who hosted such a stealth weapons was captured on film, see at 8:00min here:

<https://www.youtube.com/watch?v=2fP8tnVQH9w&feature=youtu.be&t=8m1s>

For further info, you can find the "Techno Crime Fighters Forum" on Youtube, which was a series that ran weekly for 1.5 years where my colleagues (which included the famous NSA whistleblower Karen Melton-Stewart) and I were talking about these crimes and the international investigation publicly.

After 2 years of investigation, I can confidently say that a significant fraction of the European and American population has been implanted with covert technology. The fraction depends on the category of person, the country and the age group. Intel agents, military personnel and police officers are all implanted. Judges, politicians and journalists are mostly implanted. Children and young adults born in the US after 1987, when Ronald Reagan apparently legalised the implanting of all Americans at birth, are also all implanted. Other parts of the population would range between estimated 30-60%.

So, in a nutshell, if you have children, you should be able to find eye implants in them. Or if you have ever worked on military research projects then you will have ones yourself along with RFID chips in your neck and other parts of your body.

The reason why it matters - apart from the obvious - is that all of this is being used to build up to a genocide of Americans and Europeans. It turns out that our governments have signed Genocide Treaties that require the "culling" of the population at regular intervals. The current genocide plans for the US have been published by a private Intelligence Agency specialising in the monitoring of global weapons sales and can be found here (compare population in 2017 to the Forecast for 2025):

http://www.deagel.com/country/United-States-of-America_c0001.aspx

It states that over the coming 6 years, 227 million Americans are to be murdered. This will be done with a combination of Directed Energy Weapon assaults (including those delivered by the integrated weapons technology known as 5G), bio-warfare attacks and torturing victims to death with non-consensual implants.

Hope this helps,

Katherine Horton

Dear Dr. Horton,

thank you for taking the time to write to me. As with any interview only part of what I said ever gets in print. So while I am concerned that many individuals identified as TIs may be paranoid, I do not know that for a fact. And as I said in the article, we (clinicians) have all encountered individuals who tell fantastic stories that at first blush sound delusional only to later find out that they are absolutely true. That said, many do turn out to be delusions. I try to keep an open mind about all of this. It is my intention to speak to as many individuals face-to-face or via Skype or Zoom to inquire further. I cannot do so until I have received permission by my university's Institutional Review Board. I would greatly appreciate contact information about individuals who may be willing to talk with me and answer questions that I have. I also want to hear their story. At the end of the day I strive to present the most accurate picture that I can. Right now my view of this has been at a distance and until I actually meet and talk with TIs that view is blurry at best.

Best,

DJL

Subject: Cover-Up of Crimes Against Humanity

Dear Dr. LaPorte,

I am writing to inform you that you were quoted in the Chicago Sun-Times with what was presented as your "expert opinion" but which, I'm sad to say, was not just mere off-the-cuff blithering but in fact aiding and abetting the cover-up of crimes against humanity, see here:

<https://chicago.suntimes.com/columnists/targeted-individuals-surveillance-government-paranoid/>

It is an undeniable and to journalists well-known fact that thousands of innocent Americans and Europeans have been entered into Nazi-style non-consensual human experimentation involving the non-consensual implanting of their brain and body, round the clock assault with Directed Energy Weapons, terror stalking, harassment, housebreaking and bio-warfare (among a plethora of other abuses).

These crimes are not just real, they have been well documented over the past 3 decades. What has also been documented is that diagnoses of, so called, "schizophrenia" and "paranoia" are unscientific at best and a criminal cover-up of crimes against humanity along with a fraudulent conduit into brain mutilation with neuro-toxins (aka. "psycho-pharmaca") in many cases.

Should you belong to that rare breed of psychologist who lived the past 3 decades in the jungles of Borneo or behind the moon, such that you have not been made aware of these facts, then I invite you to inform yourself by contacting Dr. Hildegard Staninger who has decades of experience tracking down non-consensual implants and the criminals who have licensed the radio-frequencies that are communicating with those non-consensual implants in order to commit remote-control torture of victims.

Typical victim torture involves the broadcasting of audio (tones and conversation) to victims' covert non-consensual ear implants, which is often misdiagnosed by dim-witted psychologists and psychiatrists as "schizophrenia" or "delusions". This is typically not anchored in fact or scientific investigation, but rather in those pseudo-scientific doctor-wannabes' utter cluelessness when it comes to maths, physics, engineering and weapons technology.

Most psychologists and psychiatrists can't wrap their challenged mind around the simple fact that brain damage or illnesses cannot create human voices and perfect grammar in the ear canal or the brain of an individual (the reasons for that have to do with the Second Law of Thermodynamics - but that's for another day). It thus follows that those conversations that people report as hearing are actual conversations. In the cases I looked at, I found radio-frequency emissions coming out of the ear area and the neck or back of head of the victims. This is consistent with implanting with microchip technology and military communication devices. Victims often have laser surgery scars in those areas that prove that something was operated into their bodies.

If you would like to see some of the implants found in victims, get hold of the book "Global Brain Chip and Mesogens" by Dr. Hildegard Staninger, see here:
<https://www.amazon.com/Global-Mesogens-Hildegard-Staninger-Riet-1/dp/1498492002/>

Finally, if I may, I'd most humbly advise refraining from smearing the victims of a 21st century global holocaust as "schizophrenic" or "delusional". It might land you a prime seat alongside modern day Nazi war criminals from the military, Intel Agencies, hospitals and universities who are conducting these criminal human attrition experiments that have the total maiming and the death of the victims as their goal.

Best wishes and good luck with the long-term consequences of Neil Steinberg's article given the upcoming court cases,

Dr. Katherine Horton
