Dear NATO Space Command, dear Swiss military, dear Swiss Secret Service,

You have machine-gunned me with Directed Energy Weapons all of last night and you continue to machine-gun me now as I am trying to sit at my desk. Loud shots are banging off the walls and off metal objects around me. When you shot me in the head just now, I was reeling from the injury and crawled under metal shielding to lay down on my bed to recover. There you began to gun my head again with a violent shot hitting the back of my head such that it almost knocked me unconscious. When I lifted a large metal baking tray to cover my head, you began to bun my shoulders and machine-gun up and down my leg.

I ask you to cease and desist your remote-controlled maiming of my brain and body and take me out of the global extermination program. I remind you that the fee for the non-consensual use of my body, such as you are doing, is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

I attach evidence how Nazi serial killers were planted into NATO from the 1955 onwards as reported by the press back then. NATO is thus a covert Nazi killing organisation, which is why they are executing a Europe-wide mass murder of the European population. They are being supported by the Swiss military and Swiss Secret Service as they are executing UN plans to murder 3 million Swiss over the coming 6 years. Most Swiss are being machine-gunned at night in their bed without their knowledge. When they die of cancer, heart attacks or strokes as a result, the serial killers in the military and the Secret Services get away with impunity as it looks like "natural causes".

There are already reports reaching me of people dying unexpectedly here in Switzerland and also from abroad like Germany and Ireland. This mass murdering by the military, Secret Services and the NATO Space Command is going to accelerate. The survivors will put the legal liability on General Harrigian, Philip Rebord, Jean-Philippe Gaudin and the Swiss parliamentarians included in this email.

Dear Swiss Secret Service, Swiss military and NATO Space Command,

You continue to machine-gun me with Directed Energy Weapons in my home and on the streets. I am receiving shots to the head from weaponised cars and satellite weapons every single time I use the roads in Switzerland. At home, my body is being ripped through with hundreds of shots from Directed Weapons every night, despite the fact that I have to sleep under metal shielding.

Meanwhile, the Swiss Secret Service is continuing their serial-killer-style stalking. On Friday, I discovered that they have broken into my car again (like countless times before) and this time poured some type of red sand into the back of my car, see evidence photos attached. The sheets of metal that you can see behind the seats are shielding panels that I have to carry in my vehicle to protect myself as weaponised cars are being used to shoot me in the kidneys and the lungs from behind when I am on the motorway.

Tonight, the Swiss Secret Services have woken me up again at 4am with extreme pain torture through the chip implants on my head. By now, they are crippling me with agonising pain 4-5 days per week.

I ask you to cease and desist your remote-controlled maiming of my brain and body and take me out of the global extermination program. I remind you that the fee for the non-consensual use of my body, such as you are doing, is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

I also ask the Swiss parliament, included in this correspondence, to launch an investigation and the initiate the immediate removal of the leaders of the military and the Secret Services who are involved in these crimes against humanity. The criminal Secret Service networks, which are now being encouraged to go crazy and assault the civilian population as hard as they can, are the same Nazi extermination networks that are being used to mass murder the Swiss population.

To the Swiss military, Swiss Secret Service and NATO Space Command,

It is 4am and you are torturing and maiming me with intense Directed Energy Weapon gunning in my bed and the heating of dozens of chip implants on my scalp to cook my brain. The chip implants are remote-controlled through the mobile phone system and other telecommunication networks such that non-consensually implanted victims like myself are helpless against the Nazi torture that is mutilating their body in the most horrific and sadistic way.

Here is a playlist with the measurement of my non-consensual chip implants across my entire body: https://www.youtube.com/playlist?list=PLTqEXdGACJWdLK-RLEBSHF2_ZZ1tM-EAS

I ask you to cease and desist your remote-controlled maiming of my brain and body and take me out of the global extermination program. I remind you that the fee for the non-consensual use of my body, such as you are doing, is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

From the many victim cases that I am supporting, I can confirm that women and children are the most sadistically tortured, raped and maimed by the Secret Services and the military as it causes intense sexual arousal to the male psychopathic sex perverts.

There are many thousand mutilation slaves kept by the Secret Services in Europe and North American for the training of recruits, the entertainment of their agents and the development of a global integrated Directed Energy Weapon system that can kill at the speed of light using a system of satellite-weapons, mobile Directed Energy Weapon units hidden in cars, local weapons hidden at neighbours' homes and around the community, such as the 5G Directed Energy Weapon system that is instrumental to the global genocide.

Also, instrumental are the covert body implants that assist the targeting of the weapons through the walls of the home. It is estimated that 30% or more of the population has covert non-consensual implants without their knowledge. These are implanted in hospital and during night-time housebreaking when the occupants of the house are sedated with a gas. According to a whistleblower the Secret Services have been breaking into private homes for a very long time.

I attach a scientific article that outlines the development of a covert internet of body implants based on the fact that the entire population is to be implanted without their knowledge. Please note that this torture and weapons program is camouflaged in this article as "wearable" sensors. This is neuro-linguistic programming covering up the fact that these are **implanted** sensors. This becomes clear from the diagram on page 2 as no one is running around with wearable sensor such as the Fitbit around their ankle.

It is the duty of the Swiss parliamentarians to stop the sadistic torture by the Swiss Secret Service and the Swiss military and assemble an Emergency Commission for the investigation of these crimes against humanity immediately.

Dr. Katherine Horton

On Tue, 9 Jul 2019 at 02:37, Dr. Katherine Horton <contact@stop007.org> wrote:

To the Swiss military and the NATO Space Command,

It is now 2:30am and you have been machine-gunning me in bed, especially my head, with Pulsed Energy Projectiles such that there are loud impact sounds all around me like the constant patter of rain. Every time an Energy Projectile rips through my optical nerve, I see a light flash in my eyes and feel a hard knock on my skull.

I attach the evidence photos of the maiming of my body that you have caused over the last few days. Bruising happens when the energy projectile super-heats the tissue and bursts the capillary blood vessels or when the longitudinal energy of the projectile rips through the tissue and tears open blood vessels. Similarly, bleeding is caused in the brain. The three photos show the three different beam sizes you used from wide beam to pencil beam. With each occasion a joint was damaged in a targeted fashion as I was lying in bed at night such as my knee, hip or elbow. Sometimes the bruise is not directly above the joint because the Directed Energy Weapon shots were fired into the joint at an angle as I was lying in bed. Each time, I woke up and had pain in the joint for the entire day as a result of the bone damage you have caused.

I ask you to cease and desist your Nazi mutilation and extermination program and stop maiming me. I remind you that the fee for the non-consensual use of my body, such as you are doing, is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

Dr. Katherine Horton

On Mon, 8 Jul 2019 at 12:41, Dr. Katherine Horton <contact@stop007.org> wrote:

To the Swiss military and the NATO Space Command,

Last night, you machine-gunned my head continuously with Pulsed Energy Projectiles, which I recorded on film. Your Directed Energy Weapon barrage was so intense that at 2:40am I was woken up by repeated head shots and was left in agonising pain as a result of your battery. Now, I am trying to work at my desk and Pulsed Energy Projectiles are ripping through my chest and my face. I demand again that you cease and desist your sadistic maiming of my body.

I remind you that the fee for the non-consensual use of my body, such as you are doing, is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

I urge the Swiss Parliament, included in this correspondence, to task an Emergency Commission now with shutting the criminality down and arrest the criminals in the Swiss military and Swiss Secret Services. In America, authorities have tackled the criminal network known as the Deep State head-on with the removal of the Director of the FBI, James Comey, who oversaw the systematic torture of the American people with Directed Energy Weapons and non-consensual implants. A former colleague of mine, Dr. Millicent Black, was told by an FBI insider that "the FBI knows whose chips are on".

Europe has to follow suit and shut down the sadistic torturers and killers that are part of the same global crime cartel that controls both the NATO Space Command and the Swiss Secret Services. For historical reasons related to the close ties of Switzerland to the Vatican, the latter of which has now been found by a common law jury in Canada to be a Transnational Criminal Organisation, there is a hub of criminal activity here that is destroying the lives of honest, hard working people in favour of ruthless criminals and cartel prostitutes. This is tearing apart the fabric of society.

It is the responsibility of the Swiss parliamentarians collectively and individually to stop the crimes against humanity happening within Switzerland and to stop the high treason of their own military and Secret Services and their violations of the Geneva Conventions and the Universal Human Rights. Over the last few years, the Secret Services and the military have expanded the number of publicly kept mutilation slaves as a open announcement of the global genocide known as "The Great Culling" internationally. The purpose of the sadistic torture and the training of roving death squads, which are patrolling the streets in Switzerland with hidden Directed Energy Weapons, is to kill with impunity and to eviscerate the Swiss people and their standing in the world.

I attach the advert for a covert weapons system for cars sold by the German arms manufacturer Diehl and Rheinmetall. This is an example for Directed Energy Weapons hidden in cars. Devices such as these are typically sold as a method "to stop cars" but are in fact a weapon system that is gunning Swiss drivers in the head, as evidenced by the large disk that has been permanently burnt into my forehead by the criminals. The damage done by these weapons can be fine-tuned. So while in my case, the Swiss and German Secret Services decided to maim my face by burning the skin this time, the same weapons can also be used to gun the brain of car drivers, cause accidents, and cause brain cancer without the perpetrators ever being caught. For this reason, these are weapons of mass destruction and have to be removed from the Swiss roads immediately.

Should the Swiss parliament fail to take measures to stop the criminality and human rights violations, they too will be held liable for having aided and abetted crimes against humanity, torture, mutilation and genocide in Switzerland.

Dr. Katherine Horton

On Sun, 7 Jul 2019 at 04:59, Dr. Katherine Horton <contact@stop007.org> wrote:

Dear Swiss Secret Service, dear Swiss military, dear NATO Space Command,

It is 4:30am and as I am lying in bed, you are currently machine-gunning my body with Pulsed Energy Projectiles at about one shot per second. After your criminal torture session

the night of the 5th to the 6th of July, where you tortured me sadistically by heating the implants on my scalp to the point I was close to throwing up from pain, you are now mutilating my body like out of control Masonic serial killers. I ask you to stop and I ask the Swiss Parliament to finally get you under control.

There are other publicly known mutilation slaves that are being kept by you for weapons testing, for the training of death squads and to prepare for the Nazi mass slaughter of the population across Switzerland according to the Swiss genocide plans published here: http://www.deagel.com/country/Switzerland_c0193.aspx

Mr & Mrs. Tomys in Biel are one example, where you gun the elderly couple so brutally every night that you maim Mrs. Tomys into a nosebleed on a daily basis. Typically, you mutilate the women much more sadistically than the men, which is a known feature of war crimes which are committed by psychopathic degenerates driven by sexual violence. You have also tried multiple times to murder the couple.

I ask you again to cease and desist, to stop our torture immediately and to recognise our right to life and our right to our own body.

I remind you that the fee for the non-consensual use of my body, such as you are doing now is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

Dear Swiss Secret Service, dear Swiss military, dear NATO Space Command,

You are currently putting me again through extreme pain torture while machine-gunning my body in my own bed with Pulsed Energy Projectiles such that shots are ripping through my body at a rate of 2-3 per second. You are torturing and maiming my body to a set schedule every week such that you cripple me with pain for several days per week and make it impossible to sit at my desk and work as a result of the machine-gunning.

I attach the evidence photograph taken by my doctor of the laser surgery scar that Swiss Secret Services implanted in my navel in a night-time housebreaking in June 2017 after I asked them to cease and desist in person in the military HQ in Berne on 15 March 2017.

You are using such chips to rape and torture me daily. I ask you again to cease and desist, to stop my torture immediately and to recognise my right to life and my right to my own body.

I remind you that the fee for the non-consensual use of my body, such as you are doing now is 100'000'000 CHF (100 million Swiss Francs) per day, whereby the fee is incurred as soon as my body is used non-consensually.

Katherine Horton
